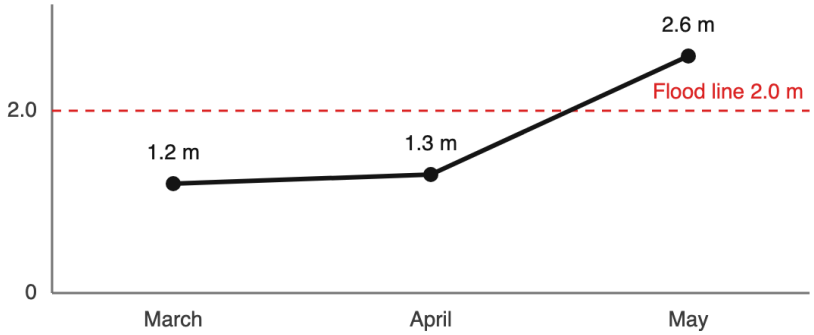
Mill Bridge river report, spring 2026

A test document for a validator experiment. The place and the figures are invented.

Summary

The river stayed below the flood line until May, then rose above it for six days.



What to do when a flood warning is issued

First, move all vehicles to the upper car park.

Then close the lower gate and switch off the pump house supply.

Last, telephone the duty officer and confirm that the site is clear.

Monthly levels

Month	Highest level	Days above the flood line
March	1.2 metres	0
April	1.3 metres	0
May	2.6 metres	6
